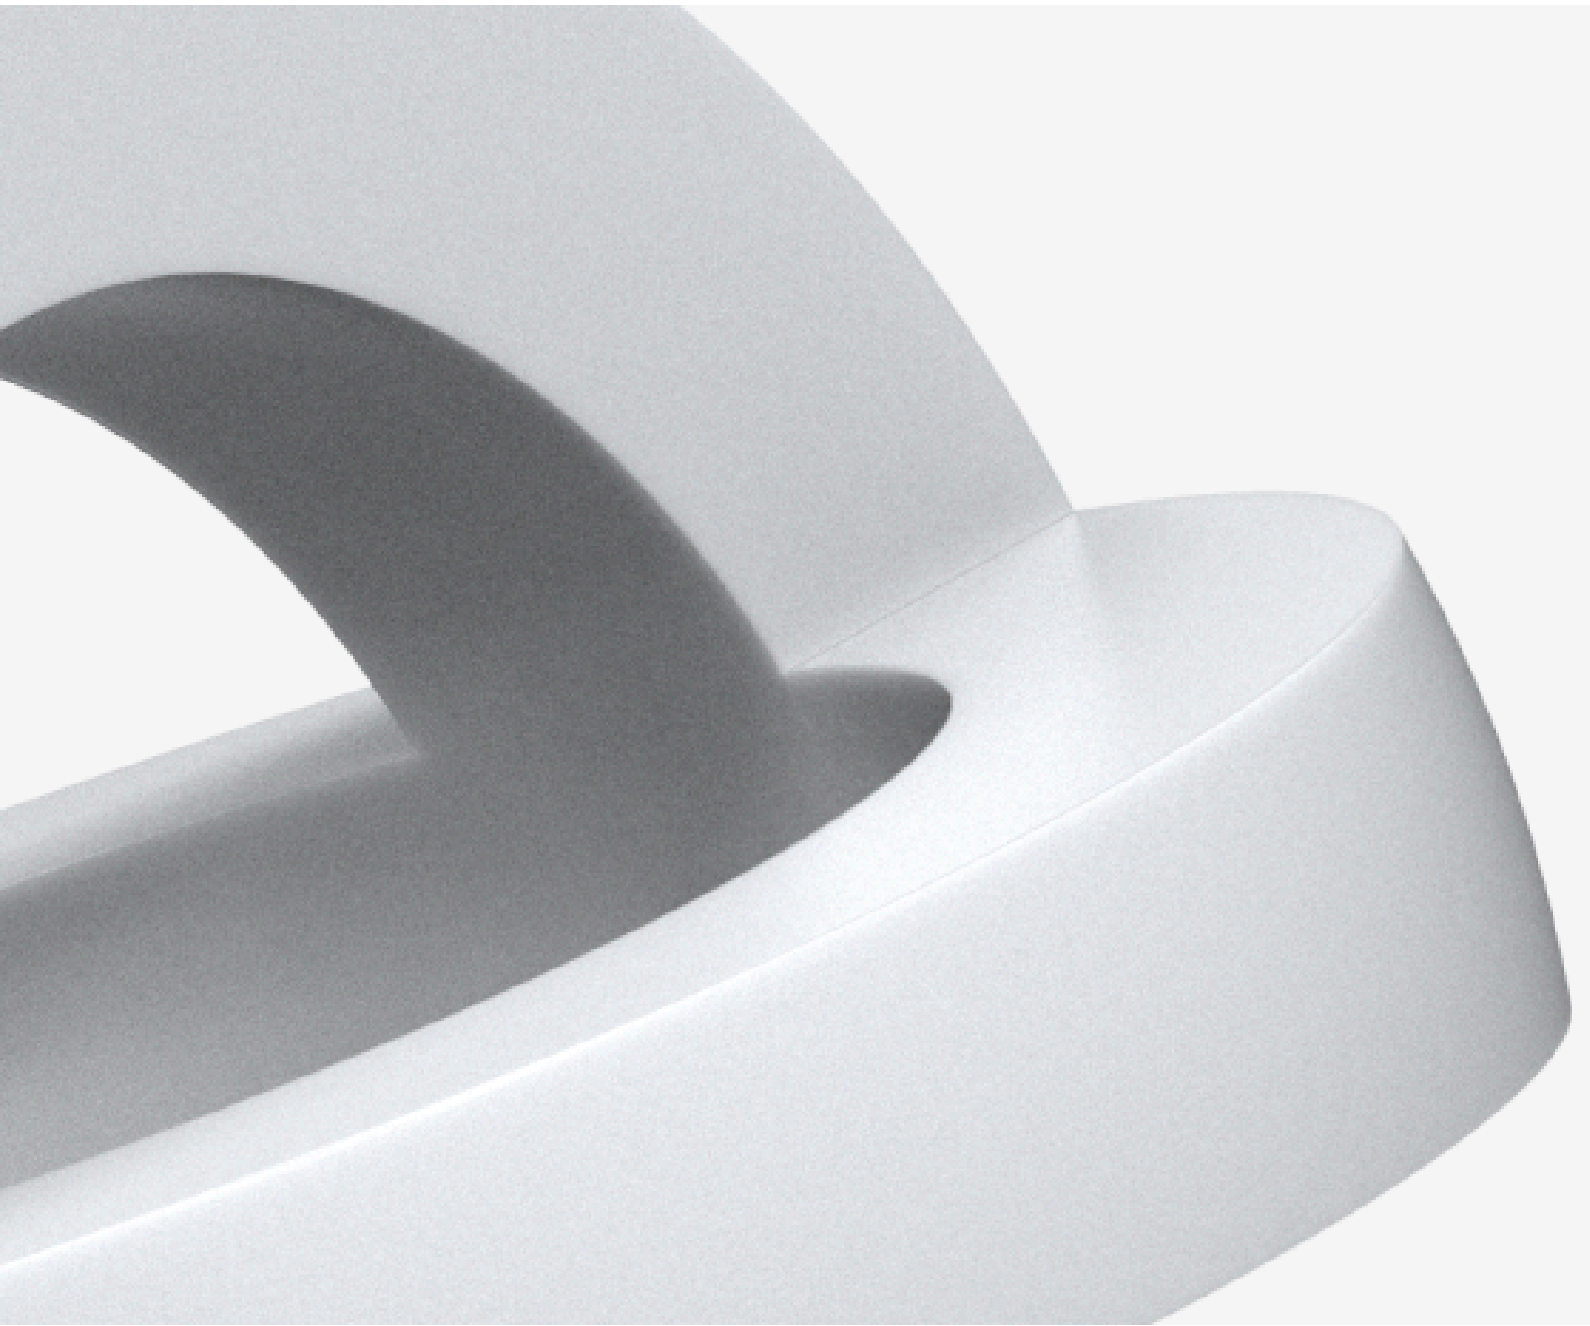
exness

API Terms of Use



1. Introduction

1.1. These API Terms of Use (or “API Key Terms”) shall apply to the Client's and/or Partner’s (collectively “User”) access to and use of Application Programming Interface (“API”) and associated API Keys (as defined below) by Exness regulated entities duly authorized and licensed to operate under the Exness brand and trademarks.

1.2 These API Key Terms shall apply and become legally effective upon the User’s creation or generation of API Keys via Exness’s Website.

1.3. These API Key Terms are to be read dynamically together with, and are directly supplemental to, the **Client Agreement** (including the General Business Terms, Risk Disclosure and Warnings Notice, and any applicable regional Appendices), and, where made available by the relevant servicing Exness entity in the applicable jurisdiction, the **Partnership Agreement** as may be updated or amended from time to time (collectively, the “Legal Documents”). These API Key Terms constitute "API Terms of Use/Product Terms" for the purposes of the Client and/or Partnership Agreements. In the event of any operational conflict or explicit inconsistency between the terms in these API Key Terms and any of the underlying Legal Documents regarding technical API operational mechanics (such as query throttling, rate limits, latency management, or payload validation protocols), these API Key Terms shall prevail specifically with respect to such technical mechanics. For the avoidance of doubt, nothing in these API Key Terms shall limit, restrict, supersede, or prejudice any rights, remedies, payment or trade withholdings, restrictions, account/wallet suspensions, or termination powers granted to the Company under the applicable Legal Documents, all of which shall apply in full force and effect to any programmatic, automated, or API-based access or operations.,

1.4. Any capitalized terms and references used in these API Key Terms which are not explicitly defined herein shall inherit the exact definition and construction provided to them in Part A, Section 2 of the Client Agreement and/or the relevant definition section of the applicable Partnership Agreement. Where a User operates in dual capacities, the definitions under the primary Legal Document corresponding to the specific API endpoint, function, or activity being performed shall govern. For the avoidance of doubt, broad umbrella defined terms under the underlying Legal Documents shall apply in full force to all corresponding programmatic access and operations under these API Key Terms.

1.5. Sections 1 through 2 and Sections 15 through 19 apply to all Users regardless of their operational capacity. Sections 3 through 9 apply exclusively to Users accessing or utilizing the API in their capacity as trading Clients. Sections 10 through 14 apply exclusively to Users accessing or utilizing the API in their capacity as Partners. Where a User acts as both a trading Client and a Partner, Sections 3 through 9 shall govern all trading and execution endpoints, while Sections 10 through 14 shall govern all partner, tracking, and referral wallet endpoints.

2. API Keys Definitions and Security Liabilities

2.1. API Keys shall mean the unique identifiers, access codes, API Keys or Tokens, and security credentials (utilizing API key) that allow a holder to programmatically access, view or operate the Client’s Account, Partner’s Account and/or Partner’s Wallet via the API. For the avoidance of doubt, when generated or utilized by a Partner, API Keys constitute security credentials and form part of "Access Data" as defined under the Partnership Agreement .

2.2. The User is solely and exclusively responsible for keeping the API Keys secure and confidential, and ensuring that the automated scripts, data integrations, algorithmic trading scripts or programmatic instructions deployed under their API Keys are engineered, maintained, and executed in absolute accordance with all applicable Laws and regulations.

2.3. The User explicitly acknowledges and agrees that Exness is not responsible or liable for any trading, non-trading or reporting, attribution tracking, commission and payouts/transfers execution, or payout activity that occurs under any API Keys generated or utilized by the User, including but not limited to unauthorized account modifications, data breaches, information leaks, commission tracking discrepancies or financial loss of funds. The User retains sole and

absolute liability for any negative balances, trading losses, or capital depreciations, commission adjustments, annulled payouts caused as a result of, or in connection with, any automated trading strategy, reporting script, commission and payouts manipulation, or payload initiated through the User's API Keys.

2.4. The User shall enforce and implement highly rigorous technical and organizational security measures to insulate the User's local API deployment against loss, theft, interception, unauthorized disclosure, or malicious third-party exploitation. The User must immediately report to Exness via support@exness.com any suspected compromise, API key or Token leak, or actual misuse of the User's API Keys so that technical teams can revoke the credentials.

2.5. By configuring and initializing an API Key, the User fully authorizes the programmatic instructions, automated orders, data requests, attribution queries, commission and payouts commands, or Partner Wallet instructions transmitted to the Exness Trading Server, partner portal systems and/or Exness Technology in accordance with the permission flags granted to that specific API key or Token. The User accepts that any system decisions, orders executed or reporting requests processed, rebate calculations triggered, or transfers requested under the User's API credentials are the User's responsibility alone. The User also acknowledges that Exness may facilitate the transmission of the User's personal account details, transaction configurations, historical positions, or referral metrics across data networks as necessitated by the User's automated commands.

2.6. Exness is legally entitled to treat any connection payload that successfully validates against an API Key or Token assigned to the Client's Account, Partner's Account or Partner Wallet(s) as an inherently authorized instruction. The User shall be fully liable for all transactions, liquidations, and margin charges realized on the Trading Platform, payout/transfer requests, or data transfers realized via the use of the User's API Keys or Tokens, regardless of whether the physical deployment was executed by a third-party script, an unauthorized person, or a malfunctioning algorithm. Exness reserves the right, acting in its sole discretion and without prior notice, to instantly disable, restrict or rate-limit any API Key if it suspects security parameters have been compromised or targeted, system or rate limits circumvented, commission, payout attribution mechanisms manipulated, or Access Data compromised.

PART A: SPECIFIC TERMS GOVERNING CLIENTS

Sections 3 through 9 apply exclusively to Users accessing or utilizing the API, API Keys, or Tokens in their capacity as trading Clients.

3. License to use the API Key & Operational restrictions

3.1. Subject to the User's continuous adherence to these API Key Terms and the broader Client Agreement and the Legal Documents available on the Legal Page, Exness hereby grants the User a personal, limited, revocable, non-sublicensable, non-transferable, and non-exclusive right and license during the active term of the User's account to use the API Key(s) solely to interface with Exness's servers for legitimate market speculation. Exness strictly retains all right, title, and intellectual property interests not expressly granted under these terms. For the avoidance of doubt, the User is completely barred from receiving, viewing, or extracting the Source Materials (as defined below).

3.2. The programmatic license granted herein is conditional upon the User's strict compliance with the following operational constraints. The User shall not, directly or indirectly:

a. Reverse engineer, decompile, disassemble, or manipulate the API endpoints, access strings, or pricing feeds to discover the source code, underlying server architecture, internal matching logic, algorithms, or proprietary mechanics of the Trading Platform or Exness Technology (collectively, the "Source Materials");

b. Modify, translate, or otherwise engineer derivatives, modifications, or localized extensions of the API software or structural data packets without express written permission from Exness;

c. Attempt to bypass permissions to access or scrape any data or personal identifiers belonging to other Exness clients;

d. Deploy or use the API Keys in a manner that violates local or international laws, applicable Sanctions, or data protection laws;

e. Challenge, question, or bring legal claims against the proprietary Intellectual Property Rights of Exness or its technology vendors;

f. Use or exploit the API Keys for any illegitimate, manipulative, or toxic trading techniques, including but not limited to latency arbitrage, price manipulation, front-running, system-flooding, quote-churning, system overload, or artificial intelligence patterns configured to exploit data processing delays;

g. Share or link API Keys across multiple unlinked accounts operating under identical parameters to mask concentrated commercial exposure.

4. API Access, Eligibility, and Restrictions

4.1 The User acknowledges and agrees that access to and use of the API is subject to the User fulfilling and continuously maintaining any and all eligibility criteria, internal parameters, and operational or financial requirements that Exness may establish, modify, or update at its sole and absolute discretion from time to time without prior notice. Exness retains the absolute right to define the requirements for API usage and may refuse, suspend, limit, or terminate API access to any User or account tier at any time, for any reason whatsoever, or without cause.

4.2 Subject to the User satisfying Exness's parameters outlined in Paragraph 4.1, Exness grants the User a limited, revocable, non-exclusive, non-transferable, and personal right to access and use its API solely for the purpose of managing the User's Account and executing Transactions in good faith. Exness shall enable the User to generate individualized API Keys directly through Exness’s Website, and the User agrees to use the API only to the extent of its documented and disclosed capabilities. Exness reserves the absolute right to monitor, restrict, suspend, or terminate API access at any time, with or without prior notice, for regulatory, security, technical, or compliance reasons.

4.3 The User may generate API Keys via Exness’s Website. The User acknowledges that API Keys constitute security credentials equivalent to account passwords (Access Data) and agrees to maintain their strict confidentiality and security at all times. The User shall be solely responsible for any use of such API Keys and agrees to comply with the API Terms of Use.

4.4 The User assumes full legal and financial responsibility for all instructions, orders, and transmissions executed on the Trading Platform via the use of their API Keys. Exness bears no liability for any unauthorized access, Account Takeover (ATO), or losses resulting from the User’s failure to safeguard their API Keys, including exposure via phishing, malware, or third-party platforms.

4.5 While automated and algorithmic trading is permitted via the API, the User strictly agrees not to engage in any API usage that compromises platform integrity. Except as expressly and unambiguously authorized under this Agreement or by Exness in writing, the User shall not:

A. The User shall remain fully responsible and liable for any loss, damage, claim, liability, cost or expense arising from or in connection with any disclosure, provision, sharing or use of the API Keys by any third party.

B. Use the API for any illegal, unauthorized, or otherwise improper purposes, or in any manner which would violate this Agreement or breach any laws or regulations, or violate the rights of third parties;

C. Use the API in any manner that overburdens, impairs, or destabilizes the smooth operation of Exness's systems, Trading Server, or infrastructure (including, but not limited to, high-frequency spamming of order requests or database queries);

D. Utilize algorithms, Custom Indicators, or automated scripts designed to systematically exploit price latency, data feed delays, or minor pricing inefficiencies (latency arbitrage);

E. Employ the API to facilitate market abuse, market manipulation, or unauthorized third-party copy-trading schemes.

4.6 Access to and interaction with the markets via the API introduces distinct risks. The User explicitly acknowledges and accepts that:

A. Exness is not liable for financial losses, unintended market exposure, or forced liquidations resulting from programming bugs, endless loops, execution formula errors, algorithmic trading errors, connectivity issues, or reliance on third-party systems, or the User's use of any artificial intelligence tool, AI agent, code-generation tool or similar technology to create, modify, review, interpret or execute any code, script, trading strategy, instruction or integration connected with the API. The User acknowledges that Exness may provide API specifications, protocols, technical documentation or instructions regarding use of the API; however, the User remains solely responsible for ensuring that any code, strategy, instruction or integration generated, assisted, interpreted or implemented through any AI tool or third-party system is accurate, secure, suitable, tested and compliant with such API specifications and with these Terms. Exness shall not be liable for any loss, mistake, malfunction, incorrect execution, unintended trade, market exposure, liquidation or other consequence arising from or in connection with the User's use of AI-generated or AI-assisted code or instructions.

B. Network delays, internet disconnections, server maintenance, or poor data packet transit rates can cause differences between the prices displayed on the User's local system and the actual price on the Trading Server. Exness does not guarantee uninterrupted API uptime and is not responsible for slippage or failed executions due to technical transmission delays.

C. Where the User uses, connects or integrates the API or API Keys with any third-party software, trading bot, bridge provider, virtual private server (VPS), AI tool, code-generation tool or other external system, the User does so entirely at their own risk and only to the extent such use does not involve any unauthorised disclosure, provision, transfer or sharing of API Keys in breach of this Agreement. Nothing in this clause shall be construed as authorising any conduct prohibited under clause 4.5. Exness gives no warranties regarding the compatibility, safety, security, accuracy or performance of any third-party tool or system and disclaims all liability for any loss arising from its malfunction, configuration error, misuse, compromise, unauthorised access or insolvency.

5. Technical and automated risk disclosures

The User acknowledges and unreservedly agrees that programmatic trading introduces distinct technical and systemic risks. The User treats the User's API Keys with the same degree of extreme security as the User's primary account passwords. The User assumes all financial risks stemming from automated access, including but not limited to:

a. Algorithmic Loops and Payload Failures: the Users are entirely liable for the design, logic, testing, and error-handling of the User's trading bots. Exness is not responsible for losses caused by broken loops, endless order submissions, or programming mistakes occurring within the User's local code framework.

b. Network Latency and Slippage: Packet transit speeds over global internet networks fluctuate. Prices displayed on the User's local system are strictly indicative. When an automated order is sent, the execution price on the Trading Server may differ due to rapid market shifts, resulting in slippage.

c. Third-Party Software Integration: If the User inputs the User's API Keys into third-party interfaces, signal providers, or trading bots, the User does so entirely at the User's own peril. Exness gives no warranties regarding the compatibility, security, or continuity of third-party systems.

d. Rate Limiting and Circuit Breakers: To preserve server equilibrium, Exness utilizes automated technical throttling. If the User's script floods the network with excessive quote queries or order submissions, the User's API access will be rate-limited or temporarily blocked. To maintain system stability and optimal performance, Exness employs automated technical controls, including price throttling, rate limiting and circuit breakers. If the User's system generates excessive quote requests, order submissions, or other traffic that may disrupt service integrity, Exness may limit, delay, throttle, or temporarily suspend the User's API access. Exness further reserves the right, at its sole discretion and as reasonably necessary for operational, liquidity, risk management, fair usage, or regulatory purposes, to apply, modify, increase, or decrease rate limits, price throttling mechanisms, and other access controls at any time, with or without prior notice where appropriate. Such measures may be implemented to preserve system performance, ensure fair usage, and maintain system stability.

To mitigate exposure, Exness strongly encourages adhering to the following strict technical parameters:

- Only allocate single-purpose functionality per generated API Key or Token.
- Strictly implement the principle of least privilege (e.g. do not enable full trading rights on API Keys or Tokens meant for read only operations).
- Promptly delete stale or unused API Keys via the Client's Personal Area.
- Configure an IP Address Whitelist on all active API configurations to reject commands coming from unrecognized source networks.
- Never upload raw API Keys into public code repositories (e.g., public GitHub branches).

6. Execution Authorization

By initializing and linking an API Key, the User grants an ongoing, automated mandate authorizing the programmatic instructions issued to the Trading Server. The User agrees that any technical inputs, automated hedging actions, or position liquidations occurring due to scripts using the User's API Keys or Tokens are the User's direct responsibility. The User further authorizes Exness to allow data transfers required to reconcile the User's automated trade requests.

7. Unilateral revocation and technical suspension

Exness retains the absolute, uninhibited right to revoke, deactivate, throttle, delete, or suspend any API Key at any time, with or without prior notice, for any justifiable business, legal, technical, or regulatory reason. The User may instantly delete the User's own generated API Keys or Tokens at any time by navigating to the API Management console inside the User's Personal Area.

8. Effect of revocation or account termination

Upon the revocation of API rights or general termination of the relationship under Part A, Section 10 of the Client Agreement:

a. All active API Keys will be instantly blacklisted, and the software license granted under Clause 3 will immediately terminate;

b. Exness shall incur zero liability for losses, open market shifts, or damages stemming from an automated position failing to close or modify due to the Client's API Keys or Tokens being disabled.

9. No warranty ("As Is" Platform execution)

9.1. Exness does not warrant or guarantee that the structural availability of the API endpoints will be continuously uninterrupted, secure, or free from data transmission bugs. API endpoints can be taken down or paused due to emergency server updates or market/system infrastructure issues.

9.2. The API services, market data streams, and matching frameworks are provided strictly on an **"as is"** and **"as available"** baseline, with no express or implied warranties of merchantability, fitness for a particular automated system, or accurate sync alignment to standard external timelines.

9.3. Exness does not warrant or guarantee that any API documentation, specifications, protocols, instructions, examples, sample code, technical descriptions or related materials are complete, accurate, up to date, error-free or suitable for the User's intended use. The User remains solely responsible for verifying, testing and validating any API integration, code, instruction, strategy or automated system before use. Exness shall not be liable for any loss, damage, error, malfunction, incorrect execution, unintended trade, market exposure, forced liquidation or other consequence arising from or in connection with any inaccuracy, omission, ambiguity, inconsistency or error in the API documentation or related materials.

PART B: SPECIFIC TERMS GOVERNING PARTNERS

Sections 10 through 14 below apply exclusively to Users accessing or utilizing the API, API Keys, or Tokens in their capacity as Partners . In the event of any conflict or explicit inconsistency between this Part B and Clauses 3 through 9 regarding Partner API operations, this Part B shall take legal precedence.

10. License to Use API Keys & Operational Scope

10.1. Subject to continuous adherence to the Legal Documents, Exness grants the User a personal, limited, revocable, non-sublicensable, non-transferable, and non-exclusive right and license during the active term of the User status to use the API Key(s) solely to programmatically access, view, monitor, and operate the Partner Account and/or Partner Wallet(s) in accordance with the Partnership Agreement. Exness reserves the right, in its sole discretion, to release API functionality in phases and to limit or restrict API access to specific features, read-only permissions, or monitoring capabilities at any time.

10.2. The User shall not, directly or indirectly:

- **a.** Reverse engineer, decompile, or manipulate API endpoints or attribution frameworks to discover the source code, underlying server architecture, or proprietary mechanics of the Partner Account, Partner Wallet(s), or Exness Technology;
- **b.** Attempt to bypass permissions to access, scrape, bulk-download, extract, store, transmit, redistribute, or resell any data, metrics, or content originating from the Partner Account and/or Partner Wallet via the API for any purpose other than monitoring their own genuine partnership activities without Exness's express written consent;
- **c.** Use the API or API Keys to generate, facilitate, or mask Fraud Traffic;
- **d.** Deploy automated scripts, bots, or programmatic instructions in bad faith to manipulate, exploit, overload, or circumvent the operation of the commission and payout mechanisms, Partner Link attribution, commission calculation mechanisms, Partner Account or Partner Wallet(s), or bypass any rate limits or security controls imposed by Exness;

e. Bypass or attempt to bypass API rate limits, price throttling, query quotas, or security controls imposed by Exness;
f. Share, sub-license, or expose API Keys across unlinked accounts, unlinked Partner Wallet(s), unapproved third-party media networks, sub-publishers, or ad brokers without express written authorization from Exness;

11. Effect of API Misuse

11.1. Any unauthorized programmatic operation, misuse, rate-limit circumvention, bad-faith manipulation, or exploitation of the Partner Account or Partner Wallet(s) via the API shall constitute a material breach of these API Key Terms and the Partnership Agreement.

11.2. Upon the occurrence of any such breach, Exness shall be entitled to immediately deactivate, restrict, or revoke any active API Keys or Access Data without prior notice. Such breach shall further entitle Exness to exercise all remedial rights, commission adjustments, payout withholdings, wallet restrictions, and termination rights set forth under the relevant Legal Document.

12. API Revocation and Technical Suspension

12.1. Without prejudice to any other rights or remedies available under the Partnership Agreement or applicable Law, Exness reserves the right to immediately deactivate, restrict, suspend, or permanently delete any active API Keys, Tokens, or API access, and/or restrict operations on associated Partner Account and/or Partner Wallet(s), without prior notice if:

(a) The User manipulates, exploits, or overloads the Partner Account, Partner Wallet(s), or API, uses manual or programmatic instructions in bad faith, circumvents system or rate limits, or compromises any Access Data; or

(b) The User breaches any provision of these API Key Terms or the underlying Partnership Agreement.

12.2. The User may at any time voluntarily revoke, delete, or deactivate their generated API Keys or Tokens by navigating to the API management section inside the Partner Personal Area or affiliate dashboard.

12.3. The deactivation or revocation of API Keys shall not relieve the User of any accrued liability, indemnification obligation, or responsibility for actions taken prior to such deactivation.

13. Disclaimer of Losses

13.1. Exness shall incur zero liability, financial or otherwise, for any unrecorded tracking data, unlogged referral calls, lost click conversions, unrecorded attribution metrics, unexecuted wallet transfers, or unaccrued commission resulting from automated data requests, programmatic instructions, or payload transmissions failing to execute or synchronize due to API downtime, rate-limiting, throttling, system maintenance, key revocation, or access restrictions placed on the Partner Account or Partner Wallet(s).

13.2. The API and all associated data feeds are provided on an "as-is" and "as-available" basis. Exness makes no warranties, express or implied, regarding the continuous uptime, accuracy, or real-time synchronization of the Partner Account and/or Partner Wallet(s) via the API.

14. Termination and Post-Termination Effects

14.1. The license and access rights granted under Section 10.1 shall terminate automatically and immediately, without requiring judicial intervention or formal advance notice, upon:

a. The deactivation, restriction, or deletion of the User's API Keys or Tokens by Exness;
b. The suspension, restriction, closure, or termination of the Partner Account and/or Partner Wallet(s), Partnership Agreement for any reason; or
c. Notice of API access termination delivered by Exness in accordance with the Legal Documents.

14.2. Upon termination of API access for any reason:

a. All rights, licenses, and privileges granted to the User to programmatically access and/or operate the Partner Account and/or Partner Wallet(s) shall instantly cease;
b. The User shall immediately purge, delete, and cease deploying any automated reporting scripts, bots, software integration layers, or programmatic instructions referencing Exness endpoints or technology, and permanently delete any cached attribution or referral data harvested from the Partner Account and/or Partner Wallet via the API; and
c. Exness shall have zero liability or obligation to process, acknowledge, execute, or credit any unlogged metrics, instructions, transfers, or unaccrued commission, payouts, or financial disbursements attempted via the API in connection with the Partner Account and/or Partner Wallet(s) following key revocation or contract termination.

15. Amendments

15.1. Exness reserves the right, acting in its sole discretion and without prior notice, to update, modify, enhance, restrict, suspend, or discontinue any aspect of the API, API endpoints, rate limits, payload formats, or programmatic functionalities of the Client Account, Partner Account and/or Partner Wallet at any time.

15.2. Exness reserves the right to modify these API Key Terms at any time without prior notice by publishing the updated terms on its Website. The User is solely responsible for regularly reviewing these API Key Terms for any updates. Continued use of the API Keys after such changes will be deemed as acceptance of the revised terms.

16. Entire Agreement

16.1. These API Key Terms represent the complete agreement between the User and Exness concerning the use of API Keys and override all previous or simultaneous communications, agreements, or proposals, whether written or verbal, between the User and Exness.

17. Translations

17.1. This document may be translated into multiple languages and made available accordingly. In the case of any discrepancies, inaccuracies, omissions, or errors in any translated version, the English version shall take precedence.

18. Severability and Governing Law

18.1. If any provision of these API Key Terms is found by a court or tribunal of competent jurisdiction to be invalid, illegal or unenforceable, such invalidity shall not affect the remaining provisions, which shall continue in full force and effect.

18.2. The governing law, jurisdiction and dispute resolution mechanisms applicable to these API Terms of Use shall be identical to those set forth in the underlying Legal Documents.

19. Definitions

Unless explicitly contextualized differently, the following specialized terms inherit these criteria:

- **"API Key(s)"** has the meaning set out in Clause 2.1.
- **"Exness Technology"** means the API protocols, execution architecture, proprietary data feeds, matching layers, tracking layers scripts, algorithms, client and partner portals and digital technical systems deployed by Exness, including the digital technical interfaces and functionalities through which the Partner Account and Partner Wallet(s) are accessed or operated.
- **"Intellectual Property Rights"** means all patents, copyrights, database structures, trading platform configurations, trade secrets, domain profiles, brand visuals, and algorithm mechanics owned or licensed by Exness globally.
- **"Sanctions"** means any financial or trade restrictions administered or enforced by the United Nations, the European Union, the United States (including OFAC), or any specific domestic regulatory body with authority over Exness's operational footprint.
- **"User"** means any Client or Partner accessing or utilizing API Keys provided by Exness under the applicable Legal Documents.
- **"Website"** inherits the respective meanings defined in Part A, Section 2 of the Client Agreement ("Website") and Section 1 of the Partnership Agreement ("Site" or "Sites").
